Being a Software Engineer, working on diverse projects, I've upgraded both technical and soft skills in the last few years. I initially began my career shift journey as a student at HackYourFuture school, where I gained hands-on experience with technologies like React, NodeJS, ExpressJS, MySQL, Firebase, and more. Recently, I'm learning more about JavaScript and React to improve my frontend skills therefore I enjoy attending coding meet-ups in Copenhagen to stay updated about the latest changes in technology and connect with like-minded people who share similar interests. I'm eager to continue my career by joining success driven and hardworking team where I will continue expanding my JavaScript knowledge into perfecting accessibility and responsive design.

EXPERIENCE

Junior Software Engineer

Awaze

Jan. 2023 – Currently

Improved customer retention through better UX. This involved optimising user authentication, data fetching, creating visually appealing IU, and ensuring a smooth payment process.

Tools and Tech used: Typescript, React, NextJS, Storybook. Contentful, AWS services (e.g. Lambda, API Gateway), New Relic, Jest, Cypress

Web Developer

Veo Technologies

Oct. 2022

Completed a one-month project-based internship focused on building a video player that could efficiently fetch both live streams and previously recorded matches from the Veo Camera.

Tools and Tech used: JavaScript, React, TypeScript, Figma

Commercial Excellence Assistant

Demant

Jun. 2020 - Dec. 2021

Designed, tested, and built pages within the learning platform, enabling individuals to connect with the knowledge and expertise necessary for enhancing their skills and performance.

Tools and Tech: iSpring Learn LMS, Figma, CSS, HTML, JavaScript

Student Assistant

Oticon Medical

Aug. 2018 - Feb. 2021

Held my first job in Denmark as a student assistant within the marketing team while pursuing my studies, acquiring valuable soft skills in the process.

EDUCATION

Full Stack Web Development

Hack Your Future Copenhagen

2021-2022

7-month coding Bootcamp with modules on HTML, CSS, JavaScript, NodeJS, ExpressJS, MySQL, and ReactJS, concluding with a collaborative final project involving the development of a structured database and the implementation of a user interface (UI). [CURRICULUM](#)
